PROJECTS

Food Delivery Web App *React, Tailwind, Redux*

<https://github.com/yogi04-ait/food-delivery>

Created a dynamic food delivery application using React, Tailwind, and Parcel, seamlessly integrating live Swiggy APIs. This project showcases my proficiency in web development, API integration, and user interface design.

Video Streaming Web App *React, Redux, Tailwind*

<https://master-beamish-crisp-f4265f.netlify.app/>

Developed a robust web application for video streaming, leveraging the live API of YouTube. Implemented cutting-edge features, including a dynamic search list suggestion with debouncing to optimize user experience
