Portfolio

Professional Summary

Full Stack MERN Developer with 2.5+ years of experience building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, real-time systems using Socket.IO, inventory optimization platforms, and enterprise delivery management solutions. Strong expertise in dashboard development, database optimization, and cloud deployment.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL.

Frontend: React.js, Redux, Tailwind CSS.

Backend: Node.js, Express.js, RESTful API Development, Socket.IO, JWT Authentication.

Databases: MongoDB, MySQL.

Cloud & DevOps: AWS, Docker, Nginx.

Tools: Git, GitHub.

Certifications: Namaste Node.js (Akshay Saini), MERN Stack Training (Cuvette).

Professional Experience

Code Icons Technology

Dec 2024 – Present

Software Engineer – Full Stack MERN Developer

Remote

Project: Inventory Optimization SaaS – React.js, Node.js, Express.js, MongoDB

- Built a **production-grade inventory optimization SaaS** to compute **Reorder Points (ROP)** and reduce stockouts for SMBs.
- Developed **interactive React.js dashboards** for inventory health, reorder alerts, and SKU-level analytics.
- Designed and implemented secure REST APIs using Node.js and Express.js for inventory ingestion and calculations.
- Engineered backend logic for **safety stock**, **lead-time demand**, and **reorder quantity** calculations.
- Optimized MongoDB schemas and indexing, improving query performance by **30%**, and implemented **RBAC** for secure access control.

Mphasis Limited (Client: FedEx)

Feb 2022 – Jun 2023

Software Engineer – Full Stack MERN Developer

Pune, India

Project: FedEx Same-Day Delivery System – React.js, Node.js, Express.js, MongoDB, Socket.IO

- Developed full-stack modules for **FedEx Same-Day Delivery Bot** using React, Node.js, Express, and MongoDB.
- Built **responsive dashboards** for bot tracking, delivery workflows, and real-time monitoring.
- Implemented **Socket.IO-based real-time updates**, reducing API polling and improving system performance.
- Designed **REST APIs and shared utilities** and optimized **MongoDB queries** for high-volume event data.
- Improved real-time visibility and reduced latency in delivery workflows by enabling **event-driven updates**.

Projects

Guruji Job Consultancy Platform | Full Stack MERN Application | Live Demo

- Built a **full-stack recruitment platform** enabling job applications, candidate enquiries, and employer hiring workflows.
- Developed a secure admin dashboard to manage jobs, applicants, hiring partners and testimonials.
- Implemented **applicant tracking** with status management, search capabilities, and Excel export functionality.
- Implemented **role-based workflows**, applicant status tracking, and automated email notifications for recruitment operations.
- Designed secure REST APIs with JWT authentication, route protection, validation, and rate limiting.
- Containerized and deployed the application on **AWS EC2** using Docker and Nginx, ensuring reliable production hosting.

Education

Guru Tegh Bahadur Institute of Technology

Aug 2017 - Sep 2021

Bachelor of Technology in Electronics and Communication (GPA: 8.00 / 10.00)

Delhi
